Request for Statements of Qualification (RFQ 23-050/MR)

Professional Engineering Design and Architectural Services for Jefferson County

Purpose

Jefferson County is requesting statements of qualifications and experience from all interested architects, engineers, consultants, and laboratories desiring to provide consultant services to the County as jobs arise. The services may include any of the following for projects being developed by the County:

- Development of Project Scope, Plans and Specifications
- Project Cost Estimating
- Architectural Services
- General Civil/Structural Engineering Design Services
- Road Design Services
- Coastal Engineering Design Services
- Materials Testing
- Surveying
- Construction Inspection
- Construction Management
- Plat and Development Review Assistance
- Environmental Services
- Floodplain Management Assistance

Procedure

Firms are encouraged to submit Statements of Qualifications to be kept on file in the Jefferson County Purchasing Department. For a given project, the responsible Jefferson County department head will appoint a selection committee, which will evaluate responses and select, in order of preference, a short list of at least three firms. Responses will be ranked on the basis of demonstrated experience, competence, and qualifications. Fees, price, work hours, or any other cost information will not be considered in the development of the short list.

Jefferson County will then enter into negotiations with the highest qualified firm. The negotiations will first establish the scope, terms and conditions, and time limits for the proposed contract. Once agreement is reached between Jefferson County and the selected firm, the County will request a fee proposal from the firm. If agreement is reached, the County will retain the firm and enter into a written contract with it. If an agreement cannot be negotiated with the selected firm, the County will then enter into negotiations with the next most qualified firm. This procedure will continue until agreement is reached and a contract is produced. If the County cannot negotiate an agreement, the procedure will be terminated.

Selection Committee

The Engineering Department head will participate in and appoint the selection committee for a given project. The department head will appoint a chairperson and no less than two (2) other members for the committee. Typically, the committee will consist of the head of the Engineering Department, a person knowledgeable about procurement practices, and one additional representative from the Engineering Department and a representative from the applicable Precinct. However, this structure is not binding. Other members may be appointed as necessary and appropriate, but the total number of persons on the selection committee shall not exceed four (4) persons. Committee appointments shall be in writing and shall briefly describe the scope of the project and, if necessary, the primary disciplines required to accomplish the project, in order to assist the committee in developing a list of firms that might best accomplish the work required. Committee membership and project requirements will vary from project to project; therefore, a firm rated number one for one project could very well not even be rated for another.
