ADDENDUM TO RFQ

RFQ Number: RFQ 21-045/JW

RFQ Title: Professional Engineering Services for Electrical Vault Replacement
at the Jack Brooks Regional Airport

RFQ Due: **11:00 am CT, Wednesday, July 28, 2021**

Addendum No.: 1

Issued (Date): July 22, 2021

TO RESPONDENT: This Addendum is an integral part of the RFQ package under consideration by you as a Respondent in connection with the subject matter herein identified. Jefferson County deems all sealed proposals to have been proffered in recognition and consideration of the entire RFQ package – **including all addenda**. For purposes of clarification, **receipt of this present Addendum by a Respondent should be evidenced by returning it (signed) as part of the Respondent's sealed proposal**. If the Proposal has already been received by the Jefferson County Purchasing Department, Respondent should return this addendum in a separate sealed envelope, clearly marked with the RFQ Title, RFQ Number, and Opening Date and Time, as stated above.

Reason for Issuance of this addendum:

Clarification and Additional Project Information

The information included herein is hereby incorporated into the documents of this present Bid matter and supersedes any conflicting documents or portion thereof previously issued.

Receipt of this Addendum is hereby acknowledged by the undersigned Respondent:

Clarification

Question: Are you able to provide an estimated budget/value range for this project?

Answer: As the County/Airport is requesting Statements of Qualification for this project, an estimated budget/value range is unavailable to potential respondents. Consultant(s) will be selected based on qualifications and experience, with fees determined through negotiations following the evaluation of all responses received.

Additional Project Information

Electrical Vault:

What we (County/Airport) plan to do is construct a new airfield electrical vault to replace the existing electrical vault room located in the general aviation terminal. The existing electrical vault has limited space and does not provide the infrastructure to safely operate the equipment.

The new vault will only serve the airfield lighting system and include the replacement of the constant current regulators for the airfield circuits and the airfield lighting control and monitoring system. Given the dependence on the airport during emergencies, a secondary power supply generator will be installed of sufficient size to adequately operate the airfield.
